EDUCATION

B.Tech in Computer Science, (KIET Group of Institutions (Delhi-NCR)) 2020 - 2024 (82.75%)

Intermediate/CISCE, (St. Teresa's Academy (Modinagar)) 2020 (96.25%)

High School/CISCE, (St. Teresa's Academy (Modinagar)) 2018 (93.2%)

SKILLSET

Core Languages	Python, Java, JavaScript
Frameworks	Django, Flutter, Express.js
Backend & Ops	JWT Auth, WebSockets, Microservices, Amazon EC2, S3, IAM, Cloudwatch
Database	MySQL, MongoDB, DynamoDB, Amazon RDS
Tools	Git, GitHub Actions, Postman, Swagger, Nginx, Docker, Claude Code and Orchestration

WORK EXPERIENCE

Forward Deployed Engineer Apr 2025 - Current
Minerra Health *Remote (US)*

- Developed and maintained scalable backend services in **Python (Django & DRF)**, implementing secure, modular, and reusable RESTful APIs consumed across web and mobile clients.
- Implemented **JWT-based authentication** and role-based access control (RBAC), ensuring HIPAA-compliant data handling and secure API design.
- Deployed backend services on **AWS EC2** and automated CI/CD pipelines using **GitHub Actions**, reducing deployment overhead significantly.

Backend Developer Jan 2024 - Apr 2025
Manojava Software India Private Limited *Noida (Sec-63), IN*

- Designed and built scalable **RESTful APIs** using **Node.js and Express.js**; created API documentation with Swagger and performed end-to-end testing with Postman.
- Managed and optimized **MongoDB** databases using Mongoose, improving query performance for production workloads.
- Acted as **System Architect**, translating the founders' concept into a structured, scalable technical roadmap and development plan.

PROJECTS

Sharelog – Stock Management and Analytics Platform Sept 2022
Engineered a full-stack web application for managing and visualizing stock and F&O transactions across brokers like Zerodha and Dhan. Implemented **RESTful API design patterns**, real-time data fetching, and a modular service layer following software engineering best practices.

Technologies: Python, Node.js, Express.js, MongoDB, Vue.js, Chart.js, Google OAuth

Anushka – India's First Fully Humanoid Robot Aug 2023
Developed **India's first fully autonomous humanoid receptionist robot, inaugurated by Hon'ble CM Yogi Adityanath**. Implemented NLP pipelines in Python, computer vision for face/object recognition, and ROS-based path planning, demonstrating strong applied programming fundamentals.

Technologies: Python, OpenCV, TensorFlow, ROS, Arduino
